Allowable Subject Matter

1. Claims 7 and 8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The overall claimed combination of a disposable diaper having a body portion including a layer of absorbent material and a plastic layer, which has an edge combined with a soft padding member extending from the inside to the outside of the diaper and wrapping over the plastic layer edge is neither anticipated nor rendered obvious by the prior art of record. Applicant's arguments filed 5/24/04 are persuasive with respect to page 4, paragraph 4, where applicant contends the purpose of the barrier cuff of Foreman is to capture and control liquid and solid matter not for the purpose of wrapping or protecting the edge of the diaper. As stated, the padding member of Foreman is part of a containment flap, specifically for containing waste; it would negate the purpose of the containment flap if the padding member were modified to wrap the edge of the plastic layer. Additionally, McConnell does not teach or suggest the scrim used to wrap the edge of the plastic layer is capable of serving as a liquid barrier. Applicant's arguments (page 4, paragraph 4 through page 5, paragraph 1) regarding this limitation are persuasive. Thus, the combination of Foreman/McConnell does not teach or suggest modifying the padding member of Foreman to wrap the edge of the plastic layer as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
